

Kürşat YILMAZ

Product Builder & Full-Stack Engineer (Web, iOS & Android)

👤 Profile

A visionary and results-driven Product Builder with a proven ability to independently architect and lead the entire product lifecycle. I excel at transforming complex ideas into intuitive, scalable, and market-ready applications across Web, iOS, and Android. My expertise lies in bridging the gap between high-level strategy, user-centric UI/UX design, and clean full-stack engineering. Actively seeking a challenging remote role with an innovative team to build world-class digital products.

🏢 Professional Experience

Product Builder (Lead Developer & Designer) at VoltNet - Unified EV Charging Network Platform, İstanbul

2025 — Present

- Spearheaded the end-to-end development of a full-stack solution (Web & Mobile) that unified multiple EV charging networks, reducing user friction by **40%**.
- Owned the entire product lifecycle, from initial user research and map-centric UI/UX design in Figma to integrating complex third-party APIs.
- Architected and built a scalable Node.js backend with PostgreSQL to manage real-time data and payments, ensuring high availability for a critical consumer utility.
- Single-handedly translated user feedback and technical requirements into a market-ready application that enhances customer satisfaction.
- **Tech Stack:** React, React Native, Node.js, PostgreSQL, Figma, Mapbox API

Product Builder (Lead Developer & Designer) at Lusid AI - AI-Powered Journaling & Dream Analysis App, İstanbul

2023 — Present

- Developed an innovative personal development platform that not only provides users with unique insights by analyzing their journals, but also fosters creativity and community through AI-assisted book writing and anonymous social sharing features.
- Achieved a high user engagement rate by designing a privacy-first, calming user interface in Figma.
- Built a secure and scalable backend with Supabase, ensuring total confidentiality for sensitive user data.
- **Tech Stack:** React Native, Node.js, AI API Integration, Supabase, Figma

Founder & Lead Developer at Kürşat - Niche Social Media Platform, İstanbul

2024 — Present

- Architected and built a full-featured social media platform from scratch for a cultural community, successfully achieving a user base of **5,000+ within the first month** of launch.
- Engineered a scalable backend with Node.js and MongoDB to support a custom content feed algorithm and an integrated user monetization system.
- Designed the complete user experience and interface in Figma, implementing robust testing protocols to ensure platform reliability and high performance.
- **Defined the entire product vision and roadmap**, single-handedly translating market needs into a live, community-driven application.
- **Tech Stack:** React, React Native, Node.js, MongoDB, Figma

Product Builder (Lead Developer & Designer) at İyilik Zinciri - Social Motivation App for Daily Good Deeds, İstanbul

2025 — Present

- Architected and launched a mobile application from scratch to promote social good through daily kindness actions, fostering a strong and engaged community.
- Designed an uplifting UI/UX in Figma that motivated users to complete and share "goodness tasks," directly translating user feedback into feature refinements to achieve a high daily active user ratio.
- Implemented a secure and scalable backend using Supabase, fully integrated with React Native to ensure seamless functionality.
- Led post-launch performance optimizations that significantly improved app responsiveness and user retention.
- **Tech Stack:** React Native, Supabase, Figma, TypeScript

Product Builder (Lead Developer & Designer) at Quotable - Daily Motivation & Quote Discovery App, İstanbul

2024 — Present

- Architected and launched a minimalist mobile application from concept to completion, delivering daily inspiration and enabling users to create personal collections ('QuoLists').
- Achieved a **perfect 5-star average app store rating** by designing a clean, text-focused, and highly intuitive user interface in Figma based on direct user feedback.
- Engineered the seamless, full-stack integration between the React Native front-end and a real-time Firebase backend for data management and user collection syncing.
- Led continuous post-launch optimization and troubleshooting to improve app performance and drive high user retention.
- **Tech Stack:** React Native, Firebase, Figma, TypeScript

Creative & Disciplinary Pursuits

My identity as a creator extends beyond the technical realm. As an author and music producer, I manage the entire creative lifecycle, transforming a blank page or a silent track into a finished, published work. This end-to-end process has deeply refined my skills in crafting compelling narratives for UX and executing a product vision. Concurrently, my background as a licensed amateur boxer provides the discipline, resilience, and a strategic mindset required to navigate complex engineering challenges and deliver under pressure.

Education

Ankara Üniversitesi | Ankara
Bachelor's Degree, 2023 -
